Education

Sardar Patel Institute of Technology

Bachelor of Technology – Computer Engineering ; CGPA:7 (3rd Year)

2022-2026

Mumbai, India

Higher Secondary School , Zadibal

Grade : 96%

2021-2022

Jammu & Kashmir, India

Green Valley Educational Institute

Secondary School ; Grade : 92.8%

to 2021

Jammu & Kashmir, India.

Experience

EASTSIDE / Software Developer Intern

06/2023 – 08/2023

- Developed a solid understanding of event- driven programming by working with **Event Listeners**. This allowed me to create interactive and responsive web applications that respond to user actions.
- Added **Dynamic Properties** to web elements, enhancing the user experience and making web applications more adaptable to changing data and user inputs.
- Gained a deep understanding of authentication systems and their importance in web security . I became proficient in managing **Authentication Tokens** and ensuring secure communication between the client and server.
- As part of my internship, I successfully implemented and designed a **Frequently Asked Questions(FAQ) page** for the company's website. This involved creating an intuitive and user-friendly interface to help customers find answers to common queries easily.

Projects

HEALTH CLINIC MANAGEMENT SYSTEM

2023

Developed a comprehensive Health Clinic Management System as a part of a college project. Designed and implemented a user-friendly interface to manage patient records digitally, allowing patients to access their reports online, reducing the reliance on traditional paper records. Established a robust system for maintaining and monitoring medicine records, including features to track expiration dates, ensuring the clinic operates with up-to-date and safe pharmaceuticals.

Technologies Used: Utilized HTML for structuring, CSS for styling, MySQL for database management, and PHP for dynamic content generation, resulting in a scalable and effective Health Clinic Management System.

EVENT MANAGEMENT SYSTEM

2023

Developed an interactive web-based event management application that allows users to organize and select events according to their preferences, such as formal or informal gatherings. The system integrates a user-friendly interface for event selection and scheduling, making the organization process streamlined and accessible.

Technologies Used: HTML, CSS, JavaScript for the frontend; Node.js, MongoDB, and Express for backend functionality, data management, and server-side operations.

Technical Skills

- **Languages:** C++, C, Python(Basics), HTML, CSS, JavaScript
- **Frameworks:** React, Node.js, ExpressJs
- **Database:** MySQL, MongoDB, PostgreSQL
- **Tools:** Figma, GitHub, VSCode
- **Coursework:** ML and NLP (Sem 6 Program Elective), Operating Systems, Computer Communication System.

Extracurricular Activities

- Active member of the Kashmir Beatbox Community, collaborating on performances and events to foster creativity and teamwork.
- Represented [Region] in regional-level cricket tournaments, demonstrating discipline, leadership, and team spirit.
